

let's discuss school home note this is
00:03
an intervention especially useful for
00:05
elementary students that is designed to
00:07
improve and strengthen communication
00:09
between school and home it also improves
00:12
the consistency of practices between
00:14
school and home environments it allows
00:17
parents to deliver consequences at home
00:19
for the students behavior at school the
00:22
teacher will send home a daily note
00:24
rating the students behaviors at school
00:26
based on the teacher's report the
00:28
parents provide a reinforcer at home if
00:31
the student has met the daily goal let's
00:33
look at the benefits for school home
00:35
note it includes the parent in the
00:37
intervention the parents are receiving
00:40
daily feedback regarding the students
00:42
behavior and provide the reinforcer if
00:44
the student meets the daily goal and in
00:47
contrast the parents do not deliver the
00:49
reinforcer if the daily goal is not met
00:51
however they do encourage their child to
00:54
aim to meet the daily goal the next day
00:56
you do want to ensure that the parent
00:59
will follow through with the
01:00
intervention as outlined if the parent
01:03
delivers a reinforcer despite the
01:05
student not meeting the daily goal then
01:07
the intervention will not be effective
01:08
in increasing the target behavior

01:11
parents can share information about the
01:13
student's behavior at home they can also
01:15
share about outside stressors that may
01:18
impact the student's behavior at school
01:19
these can be things such as change in
01:22
medication a lack of sleep moving to a
01:24
new home or sickness it strengthens the
01:28
communication between the school and the
01:31
parent and it allows consistency across
01:34
school and home environments
